

CLAIM AMENDMENTS

1. <sup>currently</sup> (Amended). An enclosure for use with an item of street furniture, the enclosure containing ~~for the~~ circuitry of a base station of a cellular telephone system, said circuitry receiving which receives signals from and supplying supplies signals to an antenna of the system,

~~in which~~ the enclosure including ~~includes~~ further circuitry for controlling an item of street furniture,

~~characterised in that~~ part of the circuitry of the base station being is common to part of the further circuitry.

2. <sup>currently</sup> (Amended). ~~An~~ The enclosure according to claim 1, in which ~~characterised in that~~ the common part of the circuitry includes power supply circuitry.

B2  
cont.  
3. <sup>currently</sup> (Amended). ~~An~~ The enclosure according to claim 1, in which ~~characterised in that~~ the common part of the circuitry includes ~~signalling~~ signaling circuitry.

4. <sup>currently</sup> (Amended). ~~An~~ The enclosure according to claim 1, including ~~characterised by~~ means for cooling or ventilating the interior thereof.

5. <sup>currently</sup> (Amended). ~~An~~ The enclosure according to claim 1, including ~~characterised by~~ means for controlling the ambient temperature therewithin.

6. <sup>currently</sup> (Amended). An item of street furniture having a principal function, additionally incorporating or carrying an antenna for a base station of a cellular telephone system, in combination with an enclosure for containing ~~the~~ circuitry of the base station,

the enclosure also including ~~being the same enclosure which includes~~ circuitry for use in the principal function of the item of street furniture,

~~characterised in that~~ at least part of the circuitry for the base station being is common with part of the circuitry for the principal function of the item of street furniture.

7. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, in which ~~characterised in that~~ the common part of the circuitry includes power supply circuitry.

8. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, in which ~~characterised in that~~ the common part of the circuitry includes circuitry for carrying signals to or from the base station circuitry and the circuit for the principal function of the item of street furniture.

9. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it~~ which is associated with but physically separate from the enclosure.

10. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it~~ which is physically combined with the enclosure.

11. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it~~ which is in the form of a mast carrying lighting means.

12. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it~~ which is in the form of a mast carrying a closed circuit television camera.

13. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it~~ which comprises a sign.

14. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 13, ~~characterised in that~~ in which the sign is a shop sign or an advertising sign.

15. <sup>Currently</sup> (Amended). ~~An~~ The item of street furniture according to claim 13, ~~characterised in that~~ in which the sign is a traffic sign.

*Currently*

16. (Amended). ~~An~~ The item of street furniture according to claim 6, ~~characterised in that it is~~ which comprises a drain pipe or simulated drain pipe for mounting on an external surface of a building and the antenna is mounted within the pipe.

*Currently*

17. (~~Twice~~ amended). An item of street furniture according to claim 6, ~~characterised by~~ including means for cooling or ventilating the interior of the enclosure.

18. (New). A mast,

a closed circuit television camera carried by the mast,

said mast additionally incorporating or carrying an antenna for a base station of a cellular telephone system,

said mast being in combination with an enclosure for containing the circuitry of the base station,

said enclosure also including circuitry for use with the closed circuit television camera.

19. (New). The mast according to claim 18, in which at least part of the circuitry for the base station is common with part of the circuitry for the closed circuit television camera.

20. (New). The mast according to claim 19, in which the common part of the circuitry includes power supply circuitry.

21. (New). The mast according to claim 19, in which the common part of the circuitry includes circuitry for carrying signals to or from the base station circuitry and the circuit for the closed circuit television camera.

22. (New). The mast according to claim 18, which is associated with but physically separate from the enclosure.

23. (New). The mast according to claim 18, which is physically combined with the enclosure.

24. (New). The mast according to claim 18, including means for cooling or ventilating the interior of the enclosure.

25. (New). The mast according to claim 24, including means for controlling the ambient temperature in the enclosure.
